* HFCs and PFCs are classes of greenhouse gases that include many compounds. These columns may reflect the total emissions of multiple HFC and PFC compounds, each of which has a unique Global Warming Potential (GWP). Emissions of each gas are first multiplied by their respective GWP and then summed in the total CO2-equivalent column.

VERIFICATION INFORMATION

Verification Body: SCS Engineers

Basis of Verification Opinion: The State of California Department of Finance (DOF) submitted their 2007 greenhouse gas (GHG) emission inventory report to SCS Engineers (SCS) for verification. SCS reviewed the emission inventory against the Registry's General Reporting Protocol (Version 3.0, April 2008), following the procedures outlined in the Registry's General Verification Protocol (Version 3.0, August 2008).

On October 30, 2008, SCS issued a verification report to DOF documenting verification activities as well as material/immaterial misstatements in the GHG inventory. No material misstatements were identified. SCS uploaded a completed verification opinion and verification activities checklist to CCAR on October 30, 2008.

Based on the information provided, SCS is able to certify the DOF 2007 annual emissions report without qualification.
